The Board of Trustees
Virginia Retirement System
1200 E. Main Street
Richmond, VA 23219

Dear Trustees:

Governmental Accounting Standards Board Statements No. 43 and No. 45 (GASB 43 and 45) require actuarial valuations of retiree health care and other postemployment benefit (OPEB) plans. Cavanaugh Macdonald Consulting, LLC (CMC) is submitting the results of the annual actuarial valuation of the Virginia Retirement System (VRS) Group Life Insurance Program (Plan) prepared as of June 30, 2014. While not verifying the data at source, the actuary performed tests for consistency and reasonability.

This valuation covers only the portion of the Plan providing benefits for current retirees and active employees upon retirement. This valuation does not include the Plan's benefits for members who die while actively employed. Death benefits for active employees are provided under a group term life insurance arrangement. The valuation indicates that the Annual Required Contribution (ARC) under GASB 43 and 45 is 0.97% of active covered payroll. Adjusted to include the cost for deaths in active service, the total contribution rate for the Plan is 1.31% of active covered payroll. Contribution rates for VRS employers are established every two years. The actuarially calculated employer contribution rates based on the June 30, 2014 results presented in this report are for informational purposes only.

The promised post-employment death benefits of the Group Life Insurance Program are included in the actuarially calculated contribution rates which are developed using the entry age normal actuarial cost method with projected benefits. The valuation takes into account the differentiation between Plan 1 vested members, Plan 1 non-vested members as of January 1, 2013 resulting from HB 1130 and SB 498, and Plan 2 members. The June 30, 2014 valuation is the first valuation to reflect the Hybrid Retirement Plan for eligible new hires on or after January 1, 2014 and for members that elected to opt into the Hybrid Plan. Five-year smoothed market value of assets is used for actuarial valuation purposes. GASB 43 and 45 require the discount rate used to value a plan be based on the likely return of the assets used to pay benefits. As of June 30, 2014, the plan has assets in trust solely to provide benefits to eligible recipients. Therefore, the discount rate has been set at 7.00%. In accordance with the new funding policy adopted by the Board of Trustees, the unfunded liability is being amortized by regular annual contributions as a level percentage of payroll within a closed 30 year period for the unfunded liability as of July 1, 2013, and gains and losses in subsequent years are amortized within a closed 20 year period, on the assumption that payroll will increase by 3% annually and the amortization period will decrease by one each year until reaching 0 years. In the event that the funding policy produces an effective amortization period of greater than 30 years, a 30 year amortization period is used in accordance with GASB 43 and 45. The assumptions recommended by the actuary and adopted by the Board are in the aggregate reasonably related to the experience under the Fund and to reasonable expectations of anticipated experience under the Fund and meet the parameters for the disclosures under GASB 43 and 45.

Our organization has only a contractual relationship with the Virginia Retirement System to provide actuarial consulting services and we do not provide other services to nor have a financial interest in the Virginia Retirement System. There are no known interests or relationships that our firm has with the Virginia Retirement System that may impair or appear to impair the objectivity of our work.

This is to certify that the independent consulting actuary is a member of the American Academy of Actuaries and has experience in performing valuations for public retirement systems, that the valuation was prepared in accordance with principles of practice prescribed by the Actuarial Standards Board, and that the actuarial calculations were performed by qualified actuaries in accordance with accepted actuarial procedures, based on the current provisions of the Plan and on actuarial assumptions that are internally consistent and reasonably based on the actual experience of VRS.

Future actuarial results may differ significantly from the current results presented in this report due to such factors as the following: Plan experience differing from that anticipated by the economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period or additional cost or contribution requirements based on the Plan's funded status); and changes in Plan provisions or applicable law. Since the potential impact of such factors is outside the scope of a normal annual actuarial valuation, an analysis of the range of results is not presented herein.

The Table of Contents, which immediately follows, outlines the material contained in the report.

Section I – Summary of Principal Results

1. For convenience of reference, the principal results of the valuation and a comparison with the preceding year's results are summarized below:

GROUP LIFE INSURANCE PROGRAM (\$ IN THOUSANDS)

Valuation Date	June 30, 2014	June 30, 2013
Number Active	360,855	361,080
Number Retired or Disabled	<u>159,238</u>	<u>152,622</u>
Total	520,093	513,702
Annual Covered Payroll	\$17,559,285	\$17,132,176
Assets:		
Market Value	\$ 1,079,315	\$ 887,773
Actuarial Value	\$ 992,221	\$ 836,547
Unfunded Actuarial Liability	\$ 1,709,788	\$ 1,735,144
Effective Amortization Period (Years)	29.4	30.0
Insurance Amount		
Active Members	\$35,118,570	\$34,264,352
Retired and Disabled Members	<u>7,369,106</u>	<u>7,006,128</u>
Total	\$42,487,676	\$41,270,480
Annual Required Contribution (ARC) in Dollars:		
Normal Cost	\$ 72,649	\$ 72,495
Accrued Liability	<u>94,904</u>	<u>95,231</u>
Total	\$ 167,553	\$ 167,726
ARC as a Percent of Active Payroll*:		
Normal Cost	0.42%	0.42%
Accrued Liability	<u>0.55</u>	<u>0.56</u>
Total	0.97%	0.98%
Adjustment for Active Group Life Insurance	<u>0.34%</u>	<u>0.34%</u>
Total Cost for Program	1.31%	1.32%
Contribution as ¢ per \$1,000 of Active Insurance Amount		
Active Members	14.1¢	14.1¢
Retired and Disabled Members	<u>40.6</u>	<u>40.8</u>
Total	54.7¢	54.9¢
Discount Rate	7.00%	7.00%

*Includes timing adjustment factor of 1.0192.

Section I – Summary of Principal Results (continued)

2. The previous valuation as of June 30, 2013 indicates that the Annual Required Contribution (ARC) under GASB 43 and 45 is 1.32% of active covered payroll payable for the fiscal years 2015 and 2016. The contribution rates based on the June 30, 2014 valuation are presented for informational purposes only. Comments on the valuation results as of June 30, 2014 are given in Section IV and further discussion of the contribution levels is provided in Section V.
3. The cost of benefits for members who die in active service is covered on a one-year term basis through an insurance company, and is not included in the actuarial valuation. The term cost for these active members has been provided to CMC by VRS and is currently 14.1¢ per \$1,000 of insurance. This cost is included on the previous page to provide a combined contribution rate for deaths in active service and post-employment benefits.
4. The main plan provisions of the Group Life Insurance Program, as summarized in Schedule E, were taken into account in the current valuation.
5. Changes to the actuarial assumptions and methods from the last actuarial valuation:
 - For contribution rates defined as a percent of payroll, a timing adjustment factor of 1.0192 was applied to the beginning of year rates to account for assumed middle of the year payments.
 - Timing for present value of future salary (PVFS) calculations was changed from middle of the year to beginning of the year.
 - The amortization method was updated with this valuation to consist of a closed 30 year period for the unfunded liability as of July 1, 2013, and subsequent gains and losses are amortized within a closed 20 year period, on the assumption that payroll will increase by 3% annually and the amortization period will decrease by one each year until reaching 0 years. In the event that the funding policy produces an effective amortization period of greater than 30 years, a 30 year amortization period is used in accordance with GASB 43 and 45.
 - The June 30, 2014 valuation is the first valuation to reflect the Hybrid Retirement Plan for eligible new hires on or after January 1, 2014 and for members that elected to opt into the Hybrid Plan.
6. Schedule B shows the development of the actuarial value of assets. Schedule C and Schedule D of this report outline the full set of actuarial assumptions and methods used in the current valuation. The political subdivisions have been divided into two groups. Group A consists of: City of Virginia Beach, Henrico County, Prince William County, Chesterfield County, City of Chesapeake, City of Alexandria, City of

Section I – Summary of Principal Results (continued)

Hampton, Loudoun County, City of Lynchburg, and the City of Portsmouth. Group B is all other political subdivisions not included in Group A.

Section II – Membership Data

1. Data regarding the membership of VRS for use as a basis of the valuation were furnished by VRS. The following table shows the number of active members and their annual compensation, as of June 30, 2014, on the basis of which the valuation was prepared.

TABLE 1

**THE NUMBER, ANNUAL COVERED PAYROLL, AND INSURANCE
AMOUNT OF ACTIVE MEMBERS AS OF JUNE 30, 2014
(\$ IN THOUSANDS)**

Group	Number	Covered Payroll	Insurance Amount
State Employees	75,730	\$3,854,779	\$7,709,558
Teachers	146,977	7,362,793	14,725,586
VRS Political Subdivisions	105,787	4,453,787	8,907,574
SPORS	2,011	112,303	224,606
JRS	385	59,373	118,746
VaLORS	9,429	352,709	705,418
Life Insurance Only	<u>20,536</u>	<u>1,363,541</u>	<u>2,727,082</u>
Total	360,855	\$17,559,285	\$35,118,570

The group shown above as “Life Insurance Only” consists of political subdivisions not providing VRS pension benefits and eligible members in the Optional Retirement Plan (ORP).

Schedule F, which can be found at the end of this report, shows the distribution by age and service of the number of active members included in the valuation.

Section II – Membership Data (continued)

2. The following table shows a six-year history of active member valuation data.

TABLE 2
SCHEDULE OF TOTAL ACTIVE MEMBER VALUATION DATA

Valuation Date	Number	Annual Payroll (\$ in Thousands)	Annual Average Pay	% Change in Average Pay
6/30/2014	360,855	\$17,559,285	\$48,660	2.56%
6/30/2013	361,080	17,132,176	47,447	2.47
6/30/2012	360,602	16,696,961	46,303	0.36
6/30/2011	358,536	16,542,753	46,139	0.97
6/30/2010	361,644	16,526,260	45,698	(0.10)
6/30/2009	365,682	16,728,060	45,745	2.67

3. The following table shows the number of covered retired or disabled members on the roll as of June 30, 2014 together with the amount of their insurance in force under the plan as of that date.

TABLE 3
NUMBER AND INSURANCE AMOUNT OF COVERED RETIRED OR DISABLED MEMBERS AS OF JUNE 30, 2014 (\$ IN THOUSANDS)

Group	Number	Insurance Amount
Service Retirees	142,112	\$6,442,866
Disabled Members	<u>17,126</u>	<u>926,240</u>
Total	159,238	\$7,369,106

The numbers shown above include members who are receiving long-term disability benefits from the Virginia Sickness and Disability Program (VSDP). The valuation results include an estimate of retiree liability from the “Life Insurance Only” group.

Section II – Membership Data (continued)

4. The following table shows a six-year history of members retired for service or receiving disability benefits.

TABLE 4

SCHEDULE OF RETIRANTS AND BENEFICIARIES ADDED TO AND REMOVED FROM ROLLS*

Valuation Date	Number Added to Rolls	Life Insurance Amount (\$1,000s)	Number Removed from Rolls	Life Insurance Amount (\$1,000s)	Number on Rolls at the End of the Year	Life Insurance Amount (\$1,000s)	Increase in Life Insurance Amount	Average Life Insurance Amount	Increase in Average Life Insurance Amount
6/30/2014	10,922	\$1,206,647	4,306	\$843,669	159,238	\$7,369,106	5.18%	\$46,277	0.81%
6/30/2013	10,511	1,148,100	4,203	800,829	152,622	7,006,128	5.22	45,905	0.87
6/30/2012	9,828	1,064,957	3,905	773,058	146,314	6,658,857	4.58	45,511	0.35
6/30/2011	11,216	1,205,369	4,325	714,803	140,391	6,366,958	8.35	45,352	3.03
6/30/2010	10,048	1,074,004	2,577	614,199	133,500	5,876,393	8.49	44,018	2.42
6/30/2009	8,296	887,011	10,816	455,360	126,029	5,416,588	8.66	42,979	10.83

*This schedule does not include life insurance benefits payable upon the death of an active member.

Section III – Assets

1. Schedule B shows the additions and deductions of the Plan for the year preceding the valuation date and a reconciliation of the fund balances at market value. As of June 30, 2014, the market value of assets used to determine the actuarial value of assets is \$1,079,315,000.

2. Schedule B shows the development of the five-year market related actuarial value of assets as of June 30, 2014. The five-year market related actuarial value of assets used for the current valuation is \$992,221,000.

Section IV – Comments on Valuation

1. The June 30, 2014 valuation shows the Plan has total prospective liabilities of \$3,195,026,000, of which \$1,522,758,000 is for the prospective death benefits payable on account of present retired and disabled members, and \$1,672,268,000 is for the prospective post-employment death benefits payable on account of present active members. Against these benefit liabilities, the Plan has a total present actuarial value of assets of \$992,221,000 as of June 30, 2014. The difference of \$2,202,805,000 between the total liabilities and the total present actuarial value of assets represents the present value of contributions to be made in the future on account of benefits. Schedule A of this report outlines the results of the actuarial valuation.
2. The contributions for the Plan on account of post-employment death benefits consist of normal contributions and accrued liability contributions. The normal contribution is equal to the actuarial present value of benefits accruing during the current year. The valuation indicates the normal contribution for the Plan is 0.42% of total active covered payroll.
3. Prospective normal contributions have a present value of \$493,517,000. When this amount is subtracted from \$2,202,805,000, which is the present value of the total future contributions to be made by the employers, there remains \$1,709,288,000 as the amount of future accrued liability contributions.
4. For the Plan, it is recommended that the accrued liability contribution rate payable by employers on account of retirement benefits be set at 0.55% of total active covered payroll. This rate is sufficient to liquidate the unfunded accrued liability of \$1,709,288,000, based on a 7.00% investment rate of return assumption and that aggregate payroll will increase by 3.00% each year. See Schedule G for the amortization schedule for the unfunded accrued liability. The valuation was prepared in accordance with the actuarial assumptions and the actuarial cost method, which are described in Schedule C and Schedule D.
5. The total annual required contribution (ARC) is 0.97% of total active covered payroll. This rate is equivalent to 40.6¢ per month per \$1,000 of active members' life insurance.

Section IV – Comments on Valuation (continued)

6. This valuation determines the cost of advance funding the post-employment death benefits under the Plan. The cost of death benefits for members who die in active service is covered on a one-year term basis through an insurance company and is not included in the actuarial valuation. The term cost for these active members has been provided to CMC by VRS and is currently 14.1¢ per month per \$1,000 of insurance.
7. The sum of the active term cost of 14.1¢ per \$1,000 of active members' life insurance and the post-employment advance funding cost of 40.6¢ per \$1,000 of active members' life insurance is 54.7¢ per \$1,000 of active members' life insurance.
8. The Plan experienced a liability loss since the prior valuation of \$37.2 million; primarily due to demographic and salary experience. Assets grew more than expected for an asset gain of \$49.3 million. Combining the liability loss with the asset gain results in an overall gain on the unfunded liability of \$12.1 million.

Section V – Contribution Rates

1. The table below shows the normal contribution rate, the unfunded actuarial accrued liability (UAAL), the resulting actuarially required contribution rate, and the effective amortization period for post-employment life insurance benefits payable under the Plan.

TABLE 5

**EMPLOYER CONTRIBUTION RATE EXPRESSED
AS PERCENT OF ACTIVE MEMBER COVERED PAYROLL**

	June 30, 2014
Normal Cost	0.42%
Percent to Amortize Unfunded Actuarial Accrued Liability (UAAL)	<u>0.55%</u>
Actuarial Required Contribution Rate to Pay Normal Cost and Amortize UAAL	0.97%

2. Contributions to the Plan consist of one-year term active member life insurance provided through an insurance company, and advance funding payments to support post-employment life insurance. On the basis of the valuation, we are recommending a total contribution rate of 54.7¢ per month per \$1,000 of active members' life insurance. The recommended contributions are summarized in the following table:

TABLE 6

**EMPLOYER CONTRIBUTION RATE EXPRESSED
AS CENTS PER \$1,000 OF LIFE INSURANCE COVERAGE**

Recommended Contribution	Rate	
	¢ per \$1,000 of Active Members' Life Insurance	% of Covered Payroll
Active Member Term Cost	14.1¢	0.34%
Post-Employment Advance Funding	<u>40.6¢</u>	<u>0.97%</u>
Total	54.7¢	1.31%

Section VI – Accounting Information

1. GASB 43 and 45 set forth certain items of required supplementary information to be disclosed in the financial statements of VRS and the employer. One such item is a distribution of the number of members by type of membership, as follows:

**NUMBER OF ALL MEMBERS
AS OF JUNE 30, 2014**

Group	Count
Active Members	360,855
Service Retirees	142,112
Disabled Members	<u>17,126</u>
Total	520,093

2. Another such item is the Schedule of Funding Progress, shown in the following table:

**SCHEDULE OF FUNDING PROGRESS
(\$ IN THOUSANDS)**

Actuarial Valuation Date	Actuarial Value of Assets (a)	Actuarial Accrued Liability (AAL) Entry Age (b)	Unfunded AAL (UAAL) (b - a)	Funded Ratio (a/b)	Covered Payroll (c)	UAAL as a Percentage of Covered Payroll ((b - a)/c)
6/30/2014	\$992,221	\$2,701,509	\$1,709,288	36.73%	\$17,559,285	9.73%
6/30/2013	836,547	2,571,691	1,735,144	32.53	17,132,176	10.13
6/30/2012	755,889	2,458,310	1,702,421	30.75	16,696,961	10.20
6/30/2011	852,424	2,358,977	1,506,553	36.14	16,542,753	9.11
6/30/2010	928,920	2,245,315	1,316,395	41.37	16,526,260	7.97
6/30/2009	967,188	1,994,799	1,027,611	48.49	16,728,060	6.14

Section VI – Accounting Information (continued)

3. The information presented in the required supplementary schedules was determined as part of the actuarial valuation at June 30, 2014. Additional information as of the latest actuarial valuation follows:

Valuation Date	6/30/2014
Actuarial Cost Method	Entry Age Normal
Amortization Method	Level Percentage of Pay, Closed
Payroll Growth Rate	3.00%
Effective Amortization Period	29.4 Years
Asset Valuation Method	5-year Smoothed Market
Actuarial Assumptions:	
Investment Rate of Return*	7.00%
*Includes inflation at	2.50%

The assumed investment rate of return reflects the fact a Trust has been established to set aside assets that are legally held exclusively for post-employment death benefits.

Section VII – Derivation of Experience Gains and Losses

CHANGES IN UNFUNDED ACTUARIAL ACCRUED LIABILITIES (UAAL) DURING FISCAL YEAR ENDING 2014 (\$ IN MILLIONS)

FISCAL YEAR	2014
1. Beginning of Year:	
(a) Actuarial Accrued Liability (AAL)	\$ 2,571.7
(b) Normal Cost	\$ 72.5
(c) Benefit Payments	\$ 159.4
2. End of Year:	
(a) Expected AAL [[$(1a) + (1b)$] x 1.07] – [$(1c) \times (1 + [0.07 \times 0.50])$]	\$ 2,664.3
(b) Actual AAL	\$ 2,701.5
3. Total AAL Gain (or Loss) (2a) – (2b)	\$ (37.2)
4. Actuarial Value of Assets (AVA) Beginning of Year	\$ 836.5
5. Net external cash flow during the year	\$ 46.2
6. End of Year:	
(a) Expected AVA [[$(4) \times 1.07$] + [$(5) \times (1 + [0.07 \times 0.50])$]]	\$ 942.9
(b) Actual AVA	\$ 992.2
7. AVA Gain (or Loss) (6b) – (6a)	\$ 49.3
8. Expected UAAL at End of Year (2a) – (6a)	\$ 1,721.4
9. Actual UAAL at End of Year (2b) – (6b)	\$ 1,709.3
10. UAAL Gain (or Loss) (8) – (9)	\$ 12.1

Schedule A – Results of the Valuation

**GROUP LIFE INSURANCE PROGRAM
(\$ IN THOUSANDS)**

VALUATION DATE	June 30, 2014	June 30, 2013

Schedule B – Plan Assets

GASB 43 and 45 define plan assets as resources, usually in the form of stocks, bonds, and other classes of investments, that have been segregated and restricted in a trust, or equivalent arrangement, in which (a) employer contributions to the plan are irrevocable, (b) assets are dedicated to providing benefits to retirees and their beneficiaries, and (c) assets are legally protected from creditors of the employers or plan administrator, for the payment of benefits in accordance with the terms of the plan.

For valuation purposes, an actuarial value of assets is used. This is a smoothed market value, phasing-in investment returns above or below the 7.00% assumption over five years. This smoothed value is subject to a corridor that restricts the actuarial value of assets from being more than 120% or less than 80% of the market value of assets. The actuarial value of assets used for the valuation is \$992,221,000. The corresponding market value of assets was \$1,079,315,000.

Schedule B – Plan Assets (continued)

**RECONCILIATION OF ASSETS
(\$ IN THOUSANDS)**

VALUATION DATE	June 30, 2014	June 30, 2013
1. Market value of assets at beginning of year	\$ 887,773	\$ 746,619
Revenue for the year		
Contributions		
Member	\$ 122,678	\$ 119,593
Employer	<u>82,908</u>	<u>81,122</u>
Total contributions	\$ 205,586	\$ 200,715
Net investment income	\$ 146,865	\$ 90,166
Miscellaneous revenue	<u>0</u>	<u>973</u>
2. Total revenue	\$ 352,451	\$ 291,854
Expenditures for the year		
Benefit payments	\$ 159,358	\$ 149,487

2012	46,534	141,026	(94,492)	746,619	(12.66)
2013	201,688	149,487	52,201	887,773	5.88
2014	205,586	159,358	46,228	1,079,315	4.28

Schedule C – Outline of Actuarial Assumptions and Methods

Assumptions and Methods Applicable to all Group Life Insurance Program Employer Groups

Investment Return Rate:	7.00% per annum, compounded annually (net of administrative expenses).
Inflation Assumption:	2.50% per year.
Actuarial Cost Method:	Entry age normal cost method, allocated as a level percent of payroll, from first funding age to last age before terminal retirement age. Actuarial gains and losses, as they occur, are reflected in the unfunded actuarial accrued liability. See Schedule D for a detailed explanation.
Funding Period:	The amortization period of the legacy UAAL began at 30 years on June 30, 2013 and this amortization period is to decrease by one year on each subsequent valuation date until the legacy UAAL is fully amortized (amortization period of 0 years). With each subsequent valuation, a new amortization base will be used to amortize that portion of the UAAL not covered by the current balances of the previously established amortization bases. Here, each valuation's newly allocated share of the UAAL will be amortized over a closed 20-year period. In the event this funding policy produces an effective amortization period of greater than 30 years, a 30 year amortization period for the aggregate UAAL is used in accordance with GASB 43 and 45.
Payroll Growth Rate:	3.00% per annum.
Asset Valuation Method:	The method of valuing assets is intended to recognize a "smoothed" market value of assets. Under this method, the difference between actual return on market value from investment experience and the expected return on market value is recognized over a five-year period. The resulting actuarial value of asset value cannot be less than 80% or more than 120% of the market value of assets.
"Life Insurance Only" Retirees:	Results include an estimate of retiree liability for groups not providing retiree census data. A liability equaling 10% of the active employee liability times the average retiree to active liability ratio is assumed.
Plan 1:	Members hired prior to July 1, 2010 and who were vested as of January 1, 2013.
Plan 2:	Members hired on or after July 1, 2010 but before January 1, 2014, or members hired prior to July 1, 2010 and who were not vested as of January 1, 2013. Members hired after January 1, 2014 in SPORS, VaLORS, and Political Subdivisions with LEOs/Fire Pension Benefit Coverage are in Plan 2.

Schedule C – Outline of Actuarial Assumptions and Methods (continued)

Assumptions and Methods Applicable to all Group Life Insurance Program Employer Groups

Hybrid Plan:

State, Teachers, JRS, and Political Subdivisions with General Employee Pension Benefit Coverage members hired (for JRS, appointed or elected to an original term) on or after January 1, 2014 or members in Plan 1 or Plan 2 who elected to opt into the plan during the election window held January 1, 2014 through April 30, 2014. Members of SPORS, VaLORS, and Political Subdivisions with LEOs/Fire Pension Benefit Coverage are not eligible to participate in the Hybrid Plan.

Schedule C – Outline of Actuarial Assumptions and Methods (continued)

STATE*

NORMAL RETIREMENT ELIGIBILITY:

Plan 1 Members: A member may retire with unreduced pension benefits upon Normal Retirement on or after age 65 with credit for five years of service.

Plan 2 and Hybrid Plan Members: A member may retire with unreduced pension benefits upon Normal Retirement once they attain their normal Social Security retirement age and have at least five years of service.

EARLY RETIREMENT ELIGIBILITY:

Plan 1 Members: A member may retire early with unreduced pension benefits after reaching age 50 with at least 30 years of service credit. A member may retire early with reduced pension benefits after reaching age 50 with at least ten years of service credit, or age 55 with credit for at least five years of service.

Plan 2 and Hybrid Plan Members: A member may retire early with unreduced pension benefits upon the sum of their age and their service being 90 (Rule of 90). A member may retire early with reduced pension benefits after reaching age 60 with at least five years of service credit.

DISABILITY – NON-VSDP:

A Plan 1 member hired prior to January 1, 1999 and who has declined VSDP coverage is eligible for disability retirement benefits from the first day of employment.

DISABILITY – VSDP:

A Plan 1 member hired prior to January 1, 1999 and who has elected VSDP coverage or any member hired on or after January 1, 1999. Applicable members hired prior to July 1, 2009 are eligible from the first day of employment for work related and non-work related VSDP disability benefits. Applicable members hired on or after July 1, 2009 are eligible from the first day of employment for work-related VSDP disability benefits, but must have a minimum of one year of service to be eligible for non-work related VSDP disability benefits.

*The actuarial assumptions for State are also applied to the applicable members of the Optional Retirement Plan (ORP).

Schedule C – Outline of Actuarial Assumptions and Methods (continued)

STATE

MORTALITY RATES:

Pre-Retirement:

RP-2000 Employee Mortality Table Projected with Scale AA to 2020 with Males set forward 2 years and Females set back 3 years.

Post-Retirement:

RP-2000 Combined Mortality Table Projected with Scale AA to 2020 with Females set back 1 year.

Post-Disablement:

RP-2000 Disabled Life Mortality Table with Males set back 3 years and no provision for future mortality improvement.

STATE

SALARY INCREASE RATES: The following total salary increase rates are used. The total salary increase rate consists of an inflation rate of 2.50%, a productivity component of 1.00%, and a variable merit component that is dependent on years of service.

Pay Increase Assumption	
Years of Service	Total Increase (Next Year)
1 - 2	5.35%
3	4.75
4 - 6	4.45
7	4.35
8	4.25
9 - 10	4.00
11 - 19	3.65
20 or more	3.50

Schedule C – Outline of Actuarial Assumptions and Methods (continued)

TEACHERS*

NORMAL RETIREMENT ELIGIBILITY:

Plan 1 Members: A member may retire with unreduced pension benefits upon Normal Retirement on or after age 65 with credit for five years of service.

Plan 2 and Hybrid Plan Members: A member may retire with unreduced pension benefits upon Normal Retirement once they attain their normal Social Security retirement age and have at least five years of service.

EARLY RETIREMENT ELIGIBILITY:

Plan 1 Members: A member may retire early with unreduced pension benefits after reaching age 50 with at least 30 years service credit. A member may retire early with reduced pension benefits after reaching age 50 with at least ten years of service credit, or age 55 with credit for at least five years of service.

Plan 2 and Hybrid Plan Members: A member may retire early with unreduced pension benefits upon the sum of their age and their service being 90 (Rule of 90). A member may retire early with reduced pension benefits after reaching age 60 with at least five years of service credit.

DISABILITY – NON-VLDP:

Plan 1 and Plan 2 members are eligible for disability retirement benefits from the first day of employment.

DISABILITY – VLDP:

Hybrid Plan members are eligible from the first day of employment for work-related VLDP disability benefits (or, if the employer opted-out of VLDP during the election period, a comparable plan), but must have a minimum of one year of service to be eligible for non-work related VLDP disability benefits.

*The actuarial assumptions for Teachers are also applied to the applicable members of the Optional Retirement Plan (ORP).

Schedule C – Outline of Actuarial Assumptions and Methods (continued)

TEACHERS

MORTALITY RATES:

Pre-Retirement:

RP-2000 Employee Mortality Table Projected with Scale AA to 2020 with Males set back 3 years and Females set back 5 years.

Post-Retirement:

RP-2000 Combined Mortality Table Projected with Scale AA to 2020 with Males set back 2 years and Females set back 3 years.

Post-Disablement:

RP-2000 Disabled Life Mortality Table Projected to 2020 with Males set back 1 year and no provision for future mortality improvement.

15 - 16	4.65
17	4.55
18 - 19	4.45
20 or more	3.50

Schedule C – Outline of Actuarial Assumptions and Methods (continued)

SPORS

NORMAL RETIREMENT ELIGIBILITY:

A member may retire with an unreduced pension benefit upon Normal Retirement on or after age 60 with credit for five years of service.

EARLY RETIREMENT ELIGIBILITY:

A member may retire early with a reduced pension benefit after reaching age 50 with at least five years of service credit.

DISABILITY – NON-VSDP:

A member hired prior to 1/1/1999 and who has declined VSDP coverage is eligible for disability benefits from the first day of employment.

DISABILITY – VSDP:

A Plan 1 member hired prior to January 1, 1999 and who has elected VSDP coverage or any member hired on or after January 1, 1999. Applicable members hired prior to July 1, 2009 are eligible from the first day of employment for work related and non-work related VSDP disability benefits. Applicable members hired on or after July 1, 2009 are eligible from the first day of employment for work-related VSDP disability benefits, but must have a minimum of one year of service to be eligible for non-work related VSDP disability benefits.

Schedule C – Outline of Actuarial Assumptions and Methods (continued)

JRS

WEIGHTED SERVICE CREDIT:

Plan 1 Members: Employees receive credit of one year of service multiplied by a weighting factor of 3.5 (2.5 for judges entering JRS on or after January 1, 1995). Any non-judicial VRS service credit is not weighted.

Plan 2 and Hybrid Plan Members: Employees receive credit of one year of service multiplied by a weighting factor of:

- 1.5 for judges entering JRS before age 45,
- 2.0 for judges entering JRS between ages 45 and 54, or
- 2.5 for judges entering JRS at age 55 or older.

Any non-judicial VRS service credit is not weighted.

NORMAL RETIREMENT ELIGIBILITY:

A member may retire upon Normal Retirement on or after age 65 with credit for five years of service, or age 60 with at least 30 years of service credit.

EARLY RETIREMENT ELIGIBILITY:

A member may retire early with unreduced pension benefits at age 60 with at least 30 years of service or a member may retire early with reduced pension benefits after reaching age 55 with at least five years of service credit.

DISABILITY – NON-VSDP:

Plan 1 and Plan 2 members are eligible for disability retirement benefits from the first day of employment.

DISABILITY – VSDP:

Hybrid Plan members are eligible from the first day of employment for work-related VSDP disability benefits, but must have a minimum of one year of service to be eligible for non-work related VSDP disability benefits.

Schedule C – Outline of Actuarial Assumptions and Methods (continued)

JRS

MORTALITY RATES:

Pre-Retirement:

RP-2000 Employee Mortality Table Projected with Scale AA to 2020 with Males set forward 2 years and Females set back 3 years.

Post-Retirement:

RP-2000 Combined Mortality Table Projected with Scale AA to 2020 with Females set back 1 year.

Post-Disablement:

RP-2000 Disabled Life Mortality Table with Males set back 3 years and no provision for future mortality improvement.

TERMINATION RATES: There are no assumed rates of withdrawal prior to service retirement (For causes other than death, disability, or retirement).

SALARY INCREASE RATES: Salary increase rates are 4.50%.

Schedule C – Outline of Actuarial Assumptions and Methods (continued)

VaLORS

NORMAL RETIREMENT ELIGIBILITY:

A member may retire upon Normal Retirement on or after age 60 with credit for five years of service.

EARLY RETIREMENT ELIGIBILITY:

A member may retire early after reaching age 50 with at least five years of service credit.

DISABILITY – NON-VSDP:

A member hired prior to 1/1/1999 and who has declined VSDP coverage is eligible for disability retirement benefits from the first day of employment.

DISABILITY – VSDP:

A Plan 1 member hired prior to January 1, 1999 and who has elected VSDP coverage or any member hired on or after January 1, 1999. Applicable members hired prior to July 1, 2009 are eligible from the first day of employment for work related and non-work related VSDP disability benefits. Applicable members hired on or after July 1, 2009 are eligible from the first day of employment for work-related VSDP disability benefits, but must have a minimum of one year of service to be eligible for non-work related VSDP disability benefits.

Schedule C – Outline of Actuarial Assumptions and Methods (continued)

VaLORS

MORTALITY RATES:

Pre-Retirement:

RP-2000 Employee Mortality Table Projected with Scale AA to 2020 with Males set forward 5 years and Females set back 3 years.

Post-Retirement:

RP-2000 Combined Mortality Table Projected with Scale AA to 2020 with Females set back 1 year.

Post-Disablement:

RP-2000 Disabled Life Mortality Table with Males set back 3 years and no provision for mortality improvement.

**POLITICAL SUBDIVISIONS
GROUP A**

Assumptions for Participants with General Employee Pension Benefit Coverage

NORMAL RETIREMENT ELIGIBILITY:

Plan 1 Members: A member may retire with unreduced pension benefits upon Normal Retirement on or after age 65 with credit for five years of service.

Plan 2 and Hybrid Plan Members: A member may retire with unreduced pension benefits upon Normal Retirement once they attain their normal Social Security retirement age and have at least five years of service.

EARLY RETIREMENT ELIGIBILITY:

Plan 1 Members: A member may retire early with unreduced pension benefits after reaching age 50 with at least 30 years service credit. A member may retire early with reduced pension benefits after reaching age 50 with at least ten years of service credit, or age 55 with credit for at least five years of service.

Plan 2 and Hybrid Plan Members: A member may retire early with unreduced pension benefits upon the sum of their age and their service being 90 (Rule of 90). A member may retire early with reduced pension benefits after reaching age 60 with at least five years of service credit.

DISABILITY – NON-VLDP:

Plan 1 and Plan 2 members are eligible for disability retirement benefits from the first day of employment.

DISABILITY – VLDP:

Hybrid Plan members are eligible from the first day of employment for work-related VLDP disability benefits (or, if the employer opted-out of VLDP during the election period, a comparable plan), but must have a minimum of one year of service to be eligible for non-work related VLDP disability benefits.

Schedule C – Outline of Actuarial Assumptions and Methods (continued)

**POLITICAL SUBDIVISIONS
GROUP A**

Assumptions for Participants with General Employee Pension Benefit Coverage

MORTALITY RATES:

Pre-Retirement:

RP-2000 Employee Mortality Table Projected with Scale AA to 2020 with Males set forward 4 years and Females set back 2 years.

Post-Retirement:

RP-2000 Combined Mortality Table Projected with Scale AA to 2020 with Males set forward 1 year.

Post-Disablement:

RP-2000 Disabled Life Mortality Table with Males set back 3 years and no provision for future mortality improvement.

Schedule C – Outline of Actuarial Assumptions and Methods (continued)

**POLITICAL SUBDIVISIONS
GROUP B***

Assumptions for Participants with General Employee Pension Benefit Coverage

NORMAL RETIREMENT ELIGIBILITY:

Plan 1 Members: A member may retire with unreduced pension benefits upon Normal Retirement on or after age 65 with credit for five years of service.

Plan 2 and Hybrid Plan Members: A member may retire with unreduced pension benefits upon Normal Retirement once they attain their normal Social Security retirement age and have at least five years of service.

EARLY RETIREMENT ELIGIBILITY:

Plan 1 Members: A member may retire early with unreduced pension benefits after reaching age 50 with at least 30 years service credit. A member may retire early with reduced pension benefits after reaching age 50 with at least ten years of service credit, or age 55 with credit for at least five years of service.

Plan 2 and Hybrid Plan Members: A member may retire early with unreduced pension benefits upon the sum of their age and their service being 90 (Rule of 90). A member may retire early with reduced pension benefits after reaching age 60 with at least five years of service credit.

DISABILITY – NON-VLDP:

Plan 1 and Plan 2 members are eligible for disability retirement benefits from the first day of employment.

DISABILITY – VLDP:

Hybrid Plan members are eligible from the first day of employment for work-related VLDP disability benefits (or, if the employer opted-out of VLDP during the election period, a comparable plan), but must have a minimum of one year of service to be eligible for non-work related VLDP disability benefits.

*The actuarial assumptions for Political Subdivisions Group B are also applied to members of the political subdivisions not providing VRS pension benefits.

Schedule C – Outline of Actuarial Assumptions and Methods (continued)

**POLITICAL SUBDIVISIONS
GROUP B**

Assumptions for Participants with General Employee Pension Benefit Coverage

MORTALITY RATES:

Pre-Retirement:

RP-2000 Employee Mortality Table Projected with Scale AA to 2020 with Males set forward 4 years and Females set back 2 years.

Post-Retirement:

RP-2000 Combined Mortality Table Projected with Scale AA to 2020 with Males set forward 1 year.

Post-Disablement:

RP-2000 Disabled Life Mortality Table with Males set back 3 years and no provision for future mortality improvement.

Schedule C – Outline of Actuarial Assumptions and Methods (continued)

**POLITICAL SUBDIVISIONS
GROUP B**

Assumptions for Participants with LEOs/Fire Pension Benefit Coverage

SALARY INCREASE RATES: The following salary increase rates are used. Inflation rate of 2.50% plus productivity component of 1.00% plus step-rate/promotional component as shown:

Pay Increase Assumption	
Years of Service	Total Increase (Next Year)
1 – 4	4.75%
5	4.65
6 – 9	4.40
10 - 19	4.00
20 or more	3.50

Schedule D – Actuarial Cost Method

1. The valuation is prepared on the projected benefit basis, which is used to determine the present value of each member's expected benefit payable upon death after retirement or disability. The calculations are based on the member's age, years of service, gender, and an assumed future interest earnings rate (currently 7.00%). The calculations consider the probability of a member's death or termination of employment prior to becoming eligible for a benefit and the probability of the member terminating with a service or disability benefit. The present value of the expected benefits payable to active members is added to the present value of the expected future payments to current benefit recipients to obtain the present value of all expected benefits payable to the present group of members.
2. The employer contributions required to support the benefits of the Group Life Insurance Program are determined following a level funding approach, and consist of a normal contribution and an accrued liability contribution.
3. The normal contribution is determined using the "entry age normal" method. Under this method, a calculation is made for pension benefits to determine the uniform and constant percentage rate of employer contribution which, if applied to the compensation of the average new member during the entire period of his anticipated covered service, would be required to meet the cost of all benefits payable on a member's behalf.
4. The unfunded accrued liability is determined by subtracting the current assets and the present value of prospective employer normal contributions from the present value of expected benefits to be paid from the Group Life Insurance Program. The accrued liability contribution amortizes the balance of the unfunded accrued liability over a period of years from the valuation date.

Schedule E – Summary of Main Plan Provisions as Interpreted for Valuation Purposes

The Group Life Insurance Program is administered by the Board of Trustees for the Virginia Retirement System (VRS). Contributions received are held in trust. Premiums for active employees are paid to Minnesota Life which in turn pays the life insurance proceeds to the beneficiaries. Benefit payments for post-employment benefits are made by Minnesota Life and reimbursed by the Trust. The Board sets administrative policy and determines the allocation of the assets held for investment.

The following persons are eligible to participate in the group life insurance program: Teachers, State Employees, State Police (SPORS), Judicial Employees (JRS), Virginia Law Officers (VaLORS) and those VRS members receiving long-term disability benefits from the Virginia Sickness and Disability Program (VSDP), the Virginia Local Disability Program (VLDP), or, if the employer opted-out of VLDP during the election period, a comparable plan. In addition, local political subdivisions may elect coverage. Substantially all local units covered by VRS have elected coverage in the Group Life Insurance Program, as have other political subdivisions not providing VRS pension benefits. Also, certain members of the Optional Retirement Plan (ORP) have life insurance coverage. Although certain members who were employed at the time of initial coverage under the Group Life Insurance Program may decline coverage, substantially all full-time, permanent employees participate.

Each active member is entitled to a death benefit from this program equal to two times the member's annual rate of compensation, rounded up to the next higher multiple of \$1,000. This benefit is provided for by the purchase of a group term life insurance contract from an insurance company. Active members may also be covered by Accidental Death and Dismemberment insurance, and they may elect additional amounts of insurance. These benefits are excluded from this valuation.

Each service retiree will be entitled to a death benefit from this program equal to the amount in effect immediately before his/her termination or retirement, reduced by 25% on January 1 of the first full year following the date the employee is separated from service and each year thereafter. In no event will the death benefit be less than 25% of the amount in effect at the date of termination or retirement.

Each disabled member, including those receiving benefits from VSDP or VLDP, will be entitled to a death benefit from this program, similar to the service retiree benefit, except the 25% per year reduction does not begin until the member reaches Normal Retirement Age, or the retirement date, if later. Members participating in VLDP (or a comparable plan) and State, VaLORS, SPORS, and JRS members participating in VSDP and hired on or after July 1, 2009 need at least one year of service before the member is eligible for a non-service related life insurance benefit from the Plan.

The post-employment death benefit is paid for by an addition to the contribution required to provide the active member benefit. While the active member portion of the contribution is used to purchase group term life insurance from an insurance company, the post-employment portion of the contribution is held in a trust until required to pay benefits. The post-employment contribution is actuarially determined by this valuation.

Schedule F – Schedule of Active Member Data

**SCHEDULE OF ACTIVE MEMBER DATA
